Ignition Effluent Digester

Ignition Effluent Digester unlocks the potential of your farm effluent using powerful live microbials.

- Increases biological activity for better nutrient material breakdown.
- Helps nutrient retention in the pond and in the soil.
- Creates nutrient and biologically-rich fertiliser that's also cost-effective.
- Safe, easy-to-use & worm-friendly.

GUARANTEED MINIMUM ANALYSIS

Nitrogen	7.27%
Phosphorus	5%
Potassium	1.57%
Sulphur	0.77%
Calcium	9.9%

ACTIVE INGREDIENTS

Blood meal, fish meal, bone meal, humic fulvic acid & microbial inoculants

Directions for use:

1. Add an initial three buckets to your small to medium-sized effluent pond.
2. Then, every 3 months after that, add one or two buckets depending on the amount of material in the pond.
3. In a large effluent pond or catchment, add 25 kgs per megalitre of effluent material.

NOTE: Biolink does not guarantee yield or performance.

Available in 15 kg bucket

A valuable on-farm resource

Creating compost using the 'usual' methods can take from 3 to 6 months.

For rapid, **on-farm composting in just 3 weeks**, mix Ignition Effluent Digester into your pond or catchment.

Active ingredients: how they work

BLOOD MEAL is high in Nitrogen which stimulates the microbes to break down compost and manure sludge materials. It also helps balance the Nitrogen (green material) and Carbon (brown material) ratio in compost piles. The result? When the compost or effluent sludge is applied to the soil, this energy is much more readily available.

FISH MEAL is high in Phosphorus and Nitrogen, allowing the bacteria and fungi in your compost piles or effluent ponds to proliferate.

BONE MEAL is a rich source of Phosphorus and Calcium.

MICROBES are an inoculant for compost heap and manure sludge, with favourable bacteria for an effective and quick breakdown of waste materials.

HUMIC FULVIC is a fungal stimulant. It buffers excess salt and toxins. Humic and Fulvic are concentrated Carbon sources.

A MICROBIAL BLEND of Bacillus subtilis, Enterococcus faecium, Lactobacillus plantarum, Lactobacillus casei, Pediococcus pentosaceus, Aspergillus oryzae, Aspergillus niger, Saccharomyces cerevisiae.

Certified Allowed Input
