

# Using Germinator couldn't be easier.

Use Biolink Germinator alongside your regular fertiliser regime for veggies, fruit trees, flowering plants and all types of lawn.

1

## For Veggies, Flowering Plants & Fruit Trees:

- When planting, apply a scoopful of Germinator (20 grams) around the base of the plant.
- Dig it in into soil and then use your hose or watering can to water-in.
- Apply every 6 months, whenever you're planting new plants or if your plants need a boost.

2

## For lawns:

- Apply every 6 months or when your lawn needs a boost.
- Apply 50 grams per square metre.
- Then water-in with a hose or sprinkler.

Available in  
1kg, 1.5kg and 5kg packs

## Nurture yourself. Grow your own food.

Biolink4Plants was created by two farming families with years of hands-on experience in agriculture.

Whether you're growing a few veggies in your backyard or in small pots on your apartment verandah, making the effort to be self-sustaining is a satisfying one.

We produce a range of 100% organic products to promote plant growth and help support your veggie patch or floral garden.

**Germinator** increases the effectiveness of your fertiliser by increasing nutrient availability.

Our product range for Home Gardeners like you is available at our brand **new online shop**.

# GERMINATOR

Organic Pelletised Garden  
& Lawn Starter

Uses the power of natural microbials to kick-start healthy growth in your veggies, fruit trees, flowering plants and all types of lawn

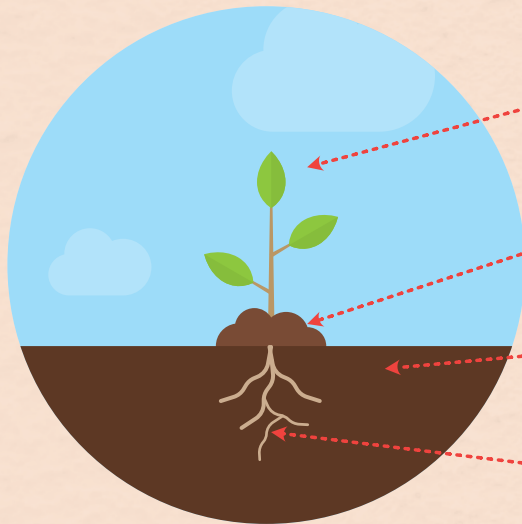

# Give your plants and lawn a boost with our all-natural, organic garden and lawn starter

Just like probiotics are good for your health, your plants and lawn will love our unique blend of live microbials.

- ▶ Ideal when establishing new plants and lawn, and great for reenergising tired plants
- ▶ Stimulates microbial activity and soil health
- ▶ Boosts nutrient uptake and strong plant growth
- ▶ Pelletised for easier, cleaner use
- ▶ Safe, worm-friendly and 100% organic

**Trialled and tested on Australian farms, Germinator is safe and ideal for use on your home garden and lawn.**

Reduces the need for pesticides and chemicals

Helps soil retain moisture and increases drought resistance

Increases soil health and a dynamic ecosystem via beneficial microbials

Boosts nutrient uptake to re-energise your plants
